

## SKILLS:

React, React Native, Express, Redux, JavaScript, TypeScript, TailwindCSS, HTML, CSS, SASS, Node.js, Visual Code Studio, Ruby

## PROJECTS:

**MAZE App** JavaScript, React, Next.js, HTML, CSS, TailwindCSS, ThirdWeb

[github](#)

Maze is a NFT portfolio e-Commerce cryptocurrency application that was inspired by eBay.

- Maze implements many of the core features of eBay, which includes the ability to list an item, auction off an item and price offerings.
- Incorporated Next.js and Thirdweb state management system to handle dynamic listing and auctioning systems.
- Used ThirdWeb React framework to perform user authorization checks and redirect users based on validity of credentials.

**Otoify** JavaScript, React, Next.js, TailwindCSS, NextAuth.js

[github](#)

A Spotify clone built using Next.js and TailwindCSS. Users can log in using their Spotify Premium account and view the playlist, artist, and albums followed by them.

- Applied protected routes using React hooks, redirecting users to secure paths based on users credentials.
- Leveraged React to create a single page web application by utilizing states throughout a users session to dynamically render React components without refreshing.
- Implemented Next.Auth to fetch tokens and API routes from the backend to interact with the database.

**Mikasa** JavaScript, React, Next.js, TailwindCSS, TypeScript, HeroIcons

[github](#)

Mikasa is a single-page, full stack web application inspired by Airbnb. Giving users the ability to view, book, and search for listings by location.

- Using React to create a single page application to allow users to render each component without refreshing.
- Implemented React Calendar function to allow users to pick days, months, years, or even decades. Supporting range selections.

## EXPERIENCE:

### Green Pine Home Health Care

Patient Coordinator / Process Coordinator

Mar 2018 - June 2019

- Established rapport and relationships with patients and external partners to cross-train and support medical staff.
- Reviewed each step of patient care and made proactive adjustments to avert issues.
